

Our quality promise

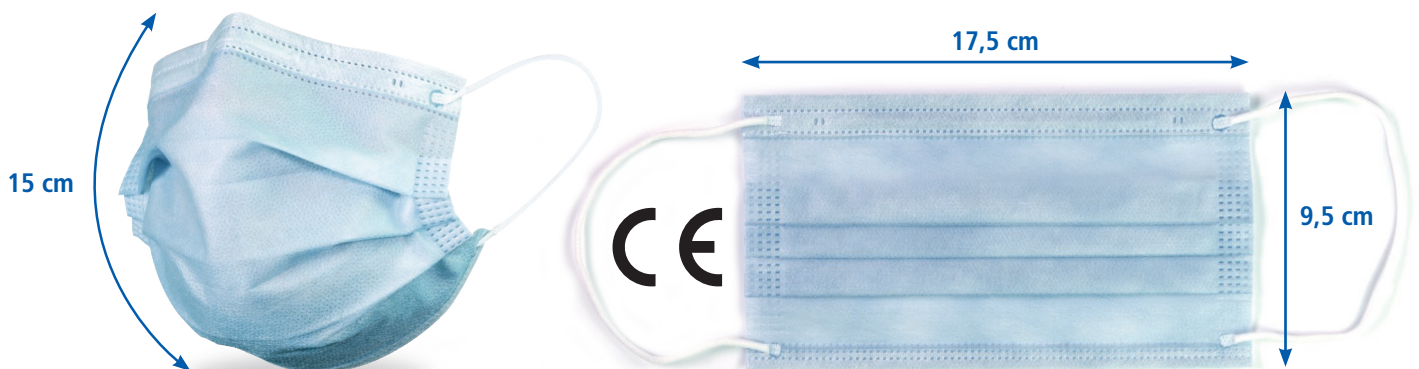

- Only selected materials are used for production.
- We promise high quality workmanship according to German standards. 100% Made in Germany.
- The highest demands on an environmentally friendly and hygienic production process, packaging and storage.
- Uncompromising and permanent quality inspection for the highest demands and security.

Medical Face Mask

Type II R · DIN EN 14683:2019-10

The high-quality manufactured and skin-friendly 3-layer mask offers secure and effective protection from infectious droplets and aerosols according to type II R as in DIN EN 14683: 2019-10.

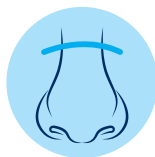

The mask even exceeds the required BFE* value of $\geq 98\%$ of the norm.

The soft and breathable material adapts ergonomically to each face shape and in combination with the elastic ear straps ensures an extra-long and high wear comfort. The gentle, skin-friendly material composition is free from glass-fibre, latex, and odours.

Flexible nose clip

Latex-free

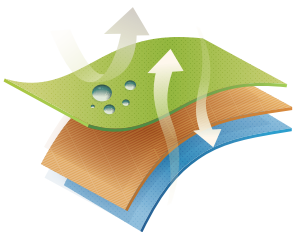

Odour-free

Bacterial filter performance $\geq 98\%$ Breathing Activity/Pressure Difference $\leq 60 \text{ Pa/cm}^2$ Microbiological purity $\leq 30 \text{ KBE/g}$

- ① **Fleece made from polypropylene**
Skin-friendly composite fiber. Absorbs the humidity of the exhaled air and ensures longlasting wear comfort.
- ② **Meltblown fleece layer**
Best filtration and guaranteed infection protection.
- ③ **Fleece made from polypropylene**
The reinforced, splash resistant outer layer prevents the penetration of potentially dangerous body fluids.

Best filtration at highest breathability. The mask does not soak through and protects from infectious troplets.
