

HAKO

ACIDIC DETERGENT FOR MILKING EQUIPMENT, PIPELINES AND MILK STORAGE CONTAINERS

RANGE OF USAGE:	Acidic detergent for cleaning dairying equipment, pipelines and cisterns in farms.
PROPERTIES:	Low-foaming acidic detergent. Hako removes deposits and precipitates, lime film and milk stone from milking equipment
PACKAGE:	1l plastic bottle, 5 l and 10 l plastic canister, 200 l barrel
DOSAGE:	0,3...1%
INSTRUCTIONS FOR USAGE:	<p>Pre-rinse surfaces and pipelines with warm water. Wash with Hako's 0,3-1% solution. Solution temperature should be between 50-60°C. Rinse carefully with clean warm (40°C) water.</p> <p>It is recommended to use Hako together with detergents Leho or Deso. For example after morning milking use Leho for cleaning milking equipment and pipelines and after evening milking use Hako for same purposes. In addition to Leho and Hako, use once a week disinfectant Oksoon.</p>
COMPOSITION:	Orthophosphoric acid 15-30%, Nitric acid 5-15%, Phosphonates <5%, surfactants <5%
pH:	pH of the use solution approx. 1,6
PRECAUTIONARY MEASURES:	Causes severe burns. Avoid contact with eyes and skin. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Wear suitable gloves and face protection.
ENVIRONMENT:	The package is from PE; clean package can be recycled. Transport packaging consists of reusable corrugated board and polyethylene film.
